

**Location:** I25 Towards Mountsorrel

**Task #** 22

**Date:** 01 August 19

**Review Date:** Jan 20

**Map:**

The path just after One Man Bridge (Before and After). We removed the summer growth from the trees closest to the path to ensure they are passable for a few more weeks at least.

The footpath under the A6 underpass was waterlogged due to the recent rain so we were unable to tackle this part of the task.

There was about a foot of water under the stile leading to the underpass.

We will come back in a few weeks to cut try again.
