

Task #	20-06	Date:	12 Mar	Review Date:	Aug 20
	Meet:		Shooting Close Lane		
	Summary:		Remove ivy from wall. Remove leaf debris from jitty and pavement up Melton Road		
	Volunteers:		8		
	Time:		10:00	12:00	
	Weather:		Cold and Dry		

A bright, sunny but chilly start before a quick shower brought ominous grey clouds and a sharp rain shower. Luckily we persevered and were rewarded with blue skies once more and a warming wind. A relatively short stop in Shooting Close Lane to keep the wall clear of ivy and sweep the leaf debris away to prevent weed growth before making our way up Melton Road towards Fishpool Way.

Ivy and leaf debris on arrival

All cleared away as we left

We have cleared this section of Melton Road a number of times now and can see the improvement each time we visit. With the recent bad weather today's task was to clear leaf debris from the path and tidy some of the previous green waste back under the shrubs and trees along the pavement.

Lots of soil was removed from the inside of the pavement to restore it to its full width once again.

Finding the inner edge of the path under all the soil from leaf debris and recent weather

Looking back after the path was cleared and the full width can be seen once again

Andy having a bit of a pose under the newly cleaned road sign

Thanks again to all our volunteers for another great turn out and lots of hard work today
