

# Tree of the Month

**January 2021**

Is awarded by **Wild About Barrow** to

**Cedar of Lebanon (Cedrus libani)  
Holbourne Close**

For its fairytale appearance and beautiful evergreen needles which spiral in clusters  
It is native to the mountains of the Eastern Mediterranean and lives for over 1,000 years.

We can't go to the Med at the moment but there's a touch of the exotic with this  
enchanted tree
